

PRICE VS COST

Focusing only on the price of your oil may guarantee an increase in your costs.

LUBSOIL® SYNTHETIC LUBRICANTS REDUCE COSTS BY:

Increasing the lifecycle of the lubricant. Lubsoil® Synthetic lubricants last 4 to 8 times longer than mineral based products. You spend less money with Lubsoil® Synthetic lubricants through buying less oil.

Reducing lubricant consumption. Lubsoil® Synthetic lubricants are inherently stable and strongly resist vaporizing in your equipment. Data supports a 30 – 40% reduction in volatility. You spend less money with Lubsoil® synthetic lubricants by reducing oil “top-ups.”

Reducing maintenance and repairs. Lubsoil® Synthetics lower the operating temperatures of your equipment, keep it precisely lubricated and free of sludge and varnish. This reduces the money you spend on maintenance and repair.

Increasing the lifecycle of your equipment. Through significantly increasing protection against machinery wear, Lubsoil® Synthetic lubricants prolong machinery life and reduce your equipment costs.

Reducing energy consumption. Lubsoil® Synthetic lubricants increase the efficiency of your equipment and reduce the money you spend on the energy to run it.

Lowering Manufacturing costs. Lubsoil® Synthetic lubricants increase productivity and decrease downtime. Lubsoil® Synthetic lubricants lower your production costs.
